

Table 1-2. Feeder Specifications

| PARAMETER                     | HIGH-SPEED MODE ONLY      |
|-------------------------------|---------------------------|
| Backbone Length:              |                           |
| Maximum .....                 | 8 in. (203 mm)            |
| Minimum .....                 | 3-1/2 in. (89 mm)         |
| Signature Width Unfolded:     |                           |
| Maximum .....                 | 24 in. (610 mm)           |
| Minimum .....                 | 7 in. (178 mm)            |
| Signature Width Folded:       |                           |
| Maximum .....                 | 12 in. (305 mm)           |
| Minimum .....                 | 3-1/2 in. (89 mm)         |
| Minimum Tab .....             | 1-1/2 in. (38 mm)         |
| Maximum Operating Speed ..... | 15,000 cph                |
| Score .....                   | Outside only              |
| Drive .....                   | From inserter drive shaft |

Table 1-3. Mount Specifications

| MOUNT          | USE   |
|----------------|---|
| FFAL-113 ..... | For installation in place of any Pacesetter 500/600 Hopper driven from existing hopper transmission. Requires only one hopper position. |
| FFAL-114 ..... | For installation in place of any FG Hopper. Requires only one hopper position. Includes electric circuitry.                             |
